## ОТДЫХ

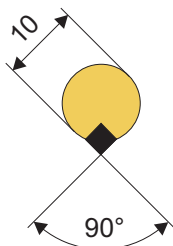

Когда цена и долговечность имеют значение

## Sport

**Надежное управление по экономичной цене.**

69,11 € / пара

Благодаря легкому управлению, спортивная модель - лучший выбор для передней подвески Yamaha TSS. Это коньки для женщин и маленьких детей, у которых, может, и нет сил тягаться с агрессивными гонщиками, но все же есть желание покататься и порадоваться жизни.

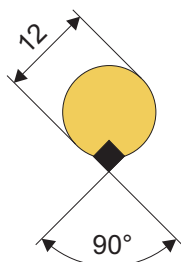

Стержень 10 мм с 5 карбидовыми вставками под 90 градусов. Общая длина карбида - 126 мм.

## Touring

**Хорошее управление по цене туристических коньков.**

69,11 € / пара

Экономичный выбор для семейного катания на снегоходе. Туристическим снегоходам нужны карбидовые коньки для безопасности на скользкой ледяной лыжне. Если вы не можете управлять своим транспортным средством, вы потеряете над ним контроль даже на низкой скорости!

Стержень 12 мм с 5 карбидовыми вставками под 90 градусов. Общая длина карбида - 127 мм.

## РАБОТА

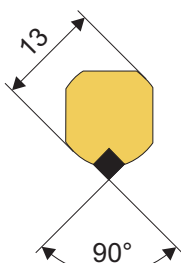

Прочные коньки, которые идут, куда захотите

## Utility

**Резкое, жесткое управление по конкурентной цене.**

73,98 € / пара

Новый тип коньков для практичных снегоходов. Эти коньки - сочетание экономичной цены коньков "Touring" и точного управления плоского фрезерованного стержня из "eXtreme". Лыжи Polaris Gripper и Lynx CTRL управляются точнее и надежнее с этими коньками.

Стержень 13 мм с 5 карбидовыми вставками под 90 градусов. Общая длина карбида - 127 мм.

Totaltek производит карбидовые коньки 24 года. Наша линейка продуктов самая разнообразная на рынке. У нас есть коньки для всех видов катания от ненапряженного проведения свободного времени до самого агрессивного сноукросса.

Какие коньки нужны вам, зависит от того, как вам больше нравится заниматься спортом. Может быть, вы любите медленно ехать на санках и наслаждаться природой, или вы жмете педаль и летите через кочки и уступы.

- У коньков "Отдых" низкая цена и легкое управление. Их владельцы допускают умеренное сцепление но высоко ценят долговечность коньков.
- Коньки "Работа" сделаны для серьезного бизнеса. Они очень хорошо управляются при тяжелой нагрузке на подготовленную лыжню.
- Коньки "Спорт" - ваш выбор, если вы ищете хорошее сцепление, стабильное управление и хороший общий баланс при быстром катании по лыжне.
- Коньки "Соревнование" имеют превосходное сцепление для любителей устойчивости на резких поворотах или тех, кто катается по глубокой лыжне.

Все карбидовые коньки Totaltek сделаны вручную в Финляндии из лучших из имеющихся материалов. Сам стержень содержит хром-молибден, который придает стали в три раза лучшую износостойкость, чем у обычной магазинной круглой стали. Этот суперпрочный материал позволяет обойтись без карбидовых вкладок на обоих концах коньков. Карбидовые коньки Totaltek золото-анодированные и кладутся в прозрачные пластиковые упаковки профессионального уровня с понятными инструкциями и простыми кодами продуктов.

## СПОРТ

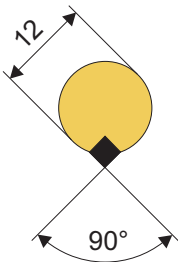

Для спортивного катания по лыжне

### Racing

**Резкое управление по конкурентной цене.**

78,86 € / пара

Наша самая популярная модель для спорта и соревнований. Если вы не уверены, что для вас лучше всего, выберите "Гонки". Два клиента из трех покупают эту модель, они не могут ошибаться!

Стержень 12 мм с 8 карбидовыми вставками под 90 градусов. Общая длина карбида - 204 мм.

## СОРЕВНОВАНИЕ

Для эндуро, сноукросса и если у вас шипы на траке

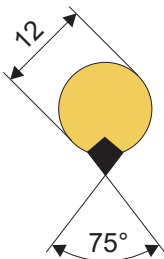

### sprINt

**Резкое и легкое управление по конкурентной цене.**

78,86 € / пара

"sprINt" - хороший компромисс между агрессивным управлением "snoCross" и легким управлением "Racing".

Мы советуем эти коньки для современных снегоходов с длинным ходом подвески. Когда подвеска все время держит лыжи на земле, управление работает хорошо также с более коротким карбидом.

Стержень 12 мм с 4 карбидовыми вставками под 75 градусов. Общая длина карбида - 130 мм.

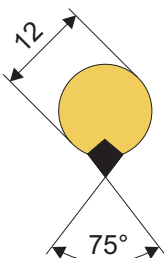

### snoCross

**Управление гоночного уровня по цене коньков для соревнований.**

83,74 € / пара

Самая многоцелевая модель Totaltek для гонок и агрессивного катания по лыжне. "snoCross" в большинстве случаев используется агрессивным водителем на жесткой лыжне со старой моделью санок и глубокой лыжней.

"snoCross" также для водителей, у которых шипы на траках снегохода и идеально сбалансированные шасси.

Стержень 12 мм с 6 карбидовыми вставками под 75 градусов. Общая длина карбида - 195 мм.

7) = Модель предусматривает установку двух коньков на одну лыжу. Можно использовать один длинный конек, высверлив крепежные отверстия в лыже.

8) = Эта модель короче, чем конек PO-06 и требует небольшой доработки лыжи для правильной установки.
